## On-Demand Virtual Servers with the Most Flexible and Predictable Pricing

All accounts come with 100 GB of block storage and free bandwidth. You will only be billed for up to 600 hours (25 days) in a given month. Additional hours for that billing cycle are free.

Design your server to meet your unique needs – we won't limit you or hold you back

## Enjoy the Freedom of a Modern Cloud

Run applications on the Linux OS of your choice

Supports standard APIs, compatible with lots of tooling options

Scale your apps both vertically and horizontally

## Unparalleled Speed

Our servers are ready for SSH in less than 30 seconds, average. Thanks to smart architecture based on SSD disks, accelerated networks and fast next-gen processors.

## Full Root Access, Full Control

Virtually no limits in the operating system choice or software versions. Major Linux distributions are already pre-loaded, or you can bring your own OS (Linux, BSD, or even MS Windows).

## Use the Devops You Love

Create servers automatically with OpenStack-compatible API requests via command line tools and programming libraries in many languages.

## A Cloud That Grows With You

All the code is open source and we publicly disclose our architecture. We will help you migrate your workloads to your own private cloud when the time comes

| FLAVOR NAME    | MEMORY | VCPU | MAX MONTHLY PRICE |
|----------------|--------|------|-------------------|
| gp1.semisonic  | 512 MB | 1    | *INR 500/-        |
| gp1.subsonic   | 1 GB   | 1    | *INR 700/-        |
| gp1.supersonic | 2 GB   | 1    | *INR 1300/-       |
| gp1.lightspeed | 4 GB   | 2    | *INR 2600/-       |
| gp1.warpspeed  | 8 GB   | 4    | *INR 5200/-       |
| gp1.hyperspeed | 16 GB  | 8    | *INR 10500/-      |
